

LEGO CHALLENGE

3. Build A Bridge

LEVEL UP:

- **Identical:** Can you build a bridge using only one type of brick?
- **Long or Short:** Build different sizes of bridge and test to see which one is the strongest.

Use a selection of bricks to build a bridge.

- How strong is it? Does the middle bend or break? Does it need supports underneath?
- Can you balance a small stack of books on it?
- How many books can you stack on it before it collapses?
